STATE WHEAT FORECAST REMAINS AT 146.2 MILLION BUSHELS

OKLAHOMA: The State's June 1, 2005, wheat production is forecast at 146.2 million bushels, the same as last month but 11 percent below last year, according to Oklahoma Agricultural Statistics. Acres harvested for grain, at 4.3 million acres, are down 400,000 acres from last year. Average yield is forecast at 34.0 bushels per acre, the same as last month but 1 bushel below 2004.

UNITED STATES: Winter wheat production is forecast at 1.55 billion bushels, down 3 percent from the May 1 forecast but 3 percent above 2004. Based on June 1 conditions, the U.S. yield is forecast at 44.1 bushels per acre, down 1.3 bushels from the previous forecast. Grain area totals 35.1 million acres, unchanged from May 1.

Selected states, their winter wheat production and percent change from last year, include: Kansas, 384.0 million bushels, up 22 percent; Washington, 127.7 million bushels, up 9 percent; Texas, 105.0 million bushels, down 3 percent; and Montana, 84.1 million bushels, up 26 percent.

WINTER WHEAT ACREAGE, YIELD, AND PRODUCTION, JUNE 1, 2005 FORECAST AND FINAL 2004
